## LEGASED natur

Special "oral wound dressing" for inflamed oral mucosa

- .... for treating aphthous stomatitis
- .... protects against chemical irritation and mechanical pressure
- .... natural ingredients produce high patient acceptance
- .... the film-forming liquid reduces the penetration of bacteria and food remnants

Dosage form and pack size:  
20 ml solution  
5 ml solution

## parodur<sup>GEL</sup>

Gel for periodontitis prophylaxis

- .... for periodontitis and gingivitis prophylaxis and for support and aftercare of the periodontitis therapy
- .... for optimising daily oral care, also for patients with reduced general conditions (patients with a higher risk)
- .... adheres very well because of its low solubility in saliva
- .... contains ingredients from chamomile, thyme, sage, comfrey and chlorhexidine

Dosage form and pack size:  
10 ml gel per tube  
available in flavours  
lime and mint

parodur<sup>Liquid</sup>

Mouth rinsing solution

- .... for periodontitis and peri-implantitis prophylaxis in conjunction with parodur Gel
- .... combined with durimplant Gel, ideal for mucositis and peri-implantitis prophylaxis
- .... regular application also protects from caries
- .... for optimising daily oral care, also for patients with reduced general conditions (patients with a higher risk)
- .... very pleasant flavour
- .... ready to use, easy to apply, suitable for permanent use

parodur<sup>Liquid</sup>
